EDUCATION

- PhD*, Psychology, Quantitative
The Ohio State University, Columbus, OH 2018
Dissertation: “Conditional Process Analysis in Two-Instance Repeated-Measures Designs”
Adviser: Andrew F. Hayes, PhD
- M.S.*, Statistics
The Ohio State University, Columbus, OH 2016
- M.A.*, Psychology, Quantitative
The Ohio State University, Columbus, OH 2016
Thesis: “Extending the Johnson-Neyman Procedure to Categorical Independent Variables:
Mathematical Derivations and Computational Tools”
Adviser: Andrew F. Hayes, PhD
- B.S.*, Psychology, Minor: Mathematics
University of Washington, Seattle, WA 2013
Cum Laude, Departmental Honors
Thesis: “Increasing Interest in Computer Science through Group Work: A Goal Congruity Approach”
Adviser: Sapna Cheryan, PhD & Allison Master, PhD

RESEARCH INTERESTS

My research focuses on improving the ability of psychology researchers to answer their questions of interest using sound statistical methods and by developing easy-to-use tools to encourage researchers to use the most advanced methods available. I have focused my research on mediation, moderation, conditional process models, structural equation modeling, and measurement including factor analysis and item response theory. I am also interested in improving our ability to conduct meta-science by developing statistical methods in meta-analysis, and understanding the impact of research practices on our ability to create replicable science. Additionally, I have previous experience and hope to continue my research focused on understanding and ameliorating issues of inequity in education, particularly for women in science, technology, engineering, and mathematics.

TEACHING INTERESTS

I value critical thinking, development of practical skills, and the ability to translate from real-life research problems to statistical methods and back again. I aim to implement these values by using active learning strategies in my classroom, teaching multiple statistical programming languages, and focusing my teaching and student assessment on implementation and interpretation. I hope to teach introductory statistics courses at the graduate and undergraduate level, including ANOVA and regression, as well as specialized courses in Mediation, Moderation and Conditional Process Analysis, Nonparametric Statistics Using Resampling, or Generalized Linear and Mixed Models.
